SUMMARY

Results-driven Mobile Application Developer with 2.5+ years of hands-on experience designing, developing, and deploying robust mobile applications using Native Android (Kotlin, Jetpack Compose) and Flutter. Proven expertise in building high-performance POS, E-commerce, and real-time interactive apps with clean architecture, REST APIs, WebSockets, and payment gateways. Proficient in managing end-to-end app release lifecycles via Google Play Console and maintaining 99%+ crash-free user sessions.

PROFESSIONAL EXPERIENCE

Software Engineer / Mobile Application Developer 05/2023
Dhaka,Bangladesh

- **Application Architecture & Development:** Architected and developed scalable Native Android and cross-platform Flutter applications following Clean Architecture and MVVM patterns.
- **POS & E-commerce Workflows:** Built and maintained enterprise-grade POS and e-commerce modules featuring dynamic product catalogs, automated billing, offline-first local caching (Room), and secure payment gateway integrations.
- **Real-time Services & Streaming:** Integrated WebSockets for low-latency in-app chat/messaging and implemented media/video streaming capabilities (WebRTC/RTSP).
- **API Integration & Performance:** Integrated complex RESTful APIs with Retrofit and Coroutines, reducing network latency and improving payload handling efficiency by 30%.
- **Play Store Release Management:** Managed end-to-end publishing pipelines on Google Play Console, successfully navigating Google Play policy updates, compliance verifications, and app bundle optimizations.
- **Bug Fixing & Optimization:** Monitored crash analytics, resolved ANRs and memory leaks, maintaining a consistent 99.2%+ crash-free user rate.
- **Version Control & Collaboration:** Collaborated with cross-functional teams (UI/UX designers, backend developers) using Git and GitLab workflows.

EDUCATION

Bachelor Of Science In Computer Science & Engineering 06/2018 – 05/2023
University of Information Technology and Sciences (UITS) Dhaka,Bangladesh

SKILLS

Core Languages:
Kotlin, Java

Networking & Real-time:
RESTful APIs, Retrofit, WebSockets, OkHttp, JSON Parsing

Database & Caching:
- Room Database, SQLite, Shared Preferences, Firebase Realtime Database / Firestore

Payment & Integration:
Payment Gateway Integrations (bKash, Nagad, SSLCommerz, Stripe) for E-commerce & POS

Mobile Platforms & UI
- Native Android SDK, Jetpack Compose, XML Layouts,KMP

Streaming & Real-time Media:
- WebRTC, RTSP / HLS Integration, Real-time Chat

Asynchronous Programming:
- Kotlin Coroutines, StateFlow / SharedFlow, Reactive Programming

DevOps, Tools & Releases:
Google Play Console (App Bundles, Release Management, Policy Compliance), Git, GitHub, GitLab, CI/CD Pipelines, Postman, Figma

KEY PROJECTS

Project 1: PosExpress
- **Tech Stack:** Kotlin, Android SDK, MVVM, Firebase Realtime Database / Room, Payment Gateway.
- Built a comprehensive POS mobile application featuring barcode scanning, offline cart management, receipt generation, and real-time transaction synchronization.
- Integrated local caching for uninterrupted offline billing and synced data immediately once connectivity was restored.
- Implemented secure digital payment solutions and managed production release on Google Play Store.

Project 2: MedSupply / E-Commerce & Distribution App
- **Tech Stack:** Kotlin / Flutter, REST APIs, Coroutines, StateFlow, Retrofit.
- Developed an end-to-end B2B supply and e-commerce application with product filtering, invoice generation, and customer debt ledger management.
- Integrated automated alerts and order tracking workflows, enhancing business transaction transparency.

Project 3: Real-Time Chat & Video Streaming Module
- **Tech Stack:** WebSockets, WebRTC / RTSP, Kotlin Coroutines.
- Integrated real-time bidirectional communication using WebSockets for instant community messaging.
- Handled live video stream feeds and media session states with minimal buffer delay.
